

AHMAD NAWEEN SAMANDAR

Ottawa, Ontario, Canada

☎ (613) 462-2107 🌐 [Personal Portfolio Website](#) ✉ asama017@uottawa.ca 🔗 [Linkedin](#) 🐙 [GitHub](#)

Summary of Qualification

- Experienced in collaborating with clients to **translate business problems** into actionable technical requirements.
- Implemented **Kanban** Agile Framework in building user-centric applications with **clean architecture**.
- Developed responsive web applications using modern libraries such as **React** and **FastAPI**.
- Built reliable architecture for relational databases such as **PostgreSQL** to store user data using Prisma.
- Designed robust **JavaScript** and **Python based API** calls ensuring data security and reliability.
- Integrated **Google Gemini** library to create conversational chatbot and enhance user experience.
- Established **CI/CD pipeline** and pre-commit validation to automated deployment.
- Skilled in cloud orchestration and deployment using **Google Cloud Platform**, **Firebase** and **Render**.

Education

University of Ottawa

Bachelor of Applied Science in Software Engineering (Co-op)

Expected: 2029

University of Ottawa

Technical Skills

Programming: Python, Java, JavaScript, Typescript, SQL, CSS/HTML

Frameworks/Libraries: Pandas, React.js, Node.js, Express.js, Nest.js, Google GenAI SDK, FastAPI, RestfulAPI, Zod

Cloud/DevOps: Docker, Firebase, Google Cloud, GitHub Actions, Render

Database: PostgreSQL

Tools: VS Code, Git, Husky, Power Automate

Experience

University of Ottawa - FHS | *Power Automate, Python, JavaScript, Excel, Pandas*

Jan 2026 - May 2026

Junior Developer Intern

- Built Planner visual email management workflow with Power Automate **reducing** task completion time by **90%**.
- Centralized incoming and outgoing messages, streamlining operations into a single, **unified pipeline**.
- Converted a static strategic plan canvas into an interactive webpage using **JavaScript** and **CSS**
- Normalized **1000+** unstructured Excel rows using **Pandas**.
- Developed **Python** script to convert normalized data into an organized JSON format.
- Engineered Power Automate flow to automatically update SharePoint list **reducing** manual data entry by **85%**

Projects

Personal Portfolio Website - Integrated with Gemini | *React.js, Gemini API, Node.js, GitHub*

Jan 2026

- Built a responsive full-stack personal portfolio utilizing **React.js**.
- Constructed **RESTful API** routes to connect frontend with **Node.js**.
- Integrated **Gemini API** to real-time conversational chatbot **enhancing** user engagement by **50%**.
- Utilized **Dotenv** library to safely manage and prevent the exposure of sensitive API keys.
- Customized LLM providing JSON schema with **Supervised-fine tuning** through API calls preventing hallucination.
- Abstracted business logic into modular **JavaScript** functions to increase maintainability.
- Enforced code quality using **Husky** pre-commit hooks for automated formatting accelerated code review by **70%**.

AlgoFinance | *React.js, FastAPI, GitHub, Gemini API*

December 2025

- Developed an AI-driven personal finance platform with **React Recharts library** visualizing numbers in to charts.
- Built **FastAPI** buisness logic using Python performing complex math operations.
- Implemented **Google GenAI SDK** library to power an interactive chatbot boosting engagement by **80%**.
- Engineered custom schema to pass processed data as structured **JSON** to Gemini generating conversational summaries.
- Normalized **1,500+** rows of Excel financial data using **Pandas** and **Numpy**.
- Developed a custom frequency-based **algorithm** to automatically predict and assign expense categories.
- Optimized client-side performance by caching chat sessions in Local Storage to reduce network latency by **50%**.

Pingly - Social Work/Study Platform | *React.js, Nest.js, GitHub, PostgreSQL, RESTful API, Figma*

March 2026

- Developed a responsive student hub utilizing **React.js/Nest.js** aiming to increase student engagement by **200%**.
- Engineered centralized user module for **PostgreSQL** relational database ensuring scalability and security.
- Implemented user validation using **JSON Web Tokens (JWT)** reinforcing robust API route protection.
- Designed **10+ RESTful APIs** routes to handle seamless CRUD operations to deliver real-time UI updates.

Leadership / Extracurricular

Pitch to Power Project

July 2025 - October 2025

Project Lead and Manager

Grant - Social Planning Concel of Ottawa (SPCO)

- Directed hands-on technical workshops for students teaching practical real-world applications of **LLM**.
- Organized community cricket games demonstrating **leadership** and a commitment to promoting health and wellness.
- Coordinated project workflows facilitating **sprint planning** to ensure seamless project delivery.
